Education

National University of Science and Technology POLITEHNICA **October 2026 – July 2028 (expected)**
Graduate Student - Master's Degree in Advanced Software Services *Bucharest, Romania*

"Transilvania" University **October 2022 – July 2026**
Bachelor's Degree in Computer Engineering *Braşov, Romania*

Relevant Coursework

- Data Structures
- Algorithms Design
- Database Management
- Artificial Intelligence
- Computer Networks
- Embedded Systems
- Operating Systems
- Computer Architecture
- Microprocessor Architecture
- Digital Electronics
- Hardware Description Language
- Communications Systems

Experience

Project Manager **April 2025 – May 2025**
METAMINDS - Apprenticeship *Braşov (remote)*

- Responsible for overall project (MedicLine) coordination
- Defined objectives, planned activities and set deadlines
- Organized and facilitated progress meetings (sprint planning, brainstorming meetings, stand-up meetings)
- Communicated with all of the entities and ensured that all of the requirements are expectations are met
- Learned about Agile methodology and various management tools (Jira, Trello, etc.)

Projects

Mushroom Farm Monitoring System | *Python, Firebase, React Native* **August 2025 - June 2026**

- Engineered an automated data acquisition system using a Raspberry Pi 5 and Python to continuously monitor critical environmental factors, such as CO₂, light, temperature, humidity and soil moisture.
- Developed a cross-platform mobile application for users, using Typescript and React Native, for delivering real-time notifications regarding parameter irregularities, visualizing charts that contain past values of the parameters and modifying their thresholds.
- Implemented a multimedia component, in order to see the real-time growing status of the mushroom, using a webcam and Ngrok for tunnelling between a Python server and a public URL.

Binary Coded Decimal (BCD) to Digits Converter | *SystemVerilog, Verilog* **February 2026 - May 2026**

- Collaborated with two teammates for creating a Verification Environment for the "BCD to Digits Converter" device, enhancing my skills in Functional Verification methodologies and SystemVerilog.
- Developed the verification environment (generator, driver, interface, monitor and scoreboard) for the output side (where the Digits are provided from the BCD input).
- Created various test scenarios, in order to ensure stability for both DUT (Device Under Test) and Verification Environment.
- Presented our work during the 4th edition of the "Functional Verification Forum", held at "Transilvania" University of Braşov.

Food Delivery Website | *MongoDB, Express.js, React, Node.js* **February 2025 - June 2025**

- Co-developed a full-stack food delivery web application using the MERN stack (MongoDB, Express.js, React and Node.js), delivering a responsive and dynamic user interface.
- Applied unit testing methodologies for code quality and worked towards deployment using various practices.
- Implemented Stripe API to facilitate secure online payments.

Modern Smart Kitchen | *C++, Arduino IDE* **January 2020 - May 2021**

- Collaborated with a team of 3 highschool peers to design and implement various solutions for a modern smart kitchen, using Arduino Uno microcontroller, integrating multiple sensors for safety issues and automation.
- Developed and programmed, using Arduino IDE and C++, various sensor-based systems, including light sensors, carbon monoxide and gas detectors and PIR motion sensors, in order to enhance kitchen safety and energy efficiency.
- Presented the project at two major competitions, earning 2nd place at RoSEF and participating in the final round of European Code League, demonstrating technical proficiency and effective teamwork.
- Gained hands-on experience with embedded systems, sensor integration and real-time data processing, while improving collaboration and project management skills.

Technical Skills

Languages: HTML/CSS, JavaScript/TypeScript, C/C++, Python, Java, Verilog, SystemVerilog, Bash

Developer Tools: VS Code, Visual Studio, Arduino IDE, IntelliJ IDE, PyCharm, Android Studio, UiPath Studio

Management Tools: Trello

Technologies/Frameworks: Linux, GitHub, React, Unity, Jest

Volunteering

BEST Braşov

September 2025 – Present

President

"Transilvania" University

- Lead and manage an organization of 50+ members, driving strategic initiatives to guarantee operational continuity and the successful preparation of high-quality events.
- Partner closely with a 4-member executive board to optimize internal operational processes and enhance the quality of external services and partnerships.

BEST Braşov

September 2024 – August 2025

Vice President and Marketing Department Coordinator

"Transilvania" University

- Increased the number of our BEST Braşov's Instagram following with 15% and LinkedIn presence with 10%.
- Boosted internal engagement by 35% by implementing new processes to encourage and streamline active feedback on marketing materials from department members.
- Coordinated and mentored a 5-person marketing team, in order to ensure a consistent Visual Identity for our NGO throughout the year.
